

N° 2a - Grafometro d'ottone di Roussellot

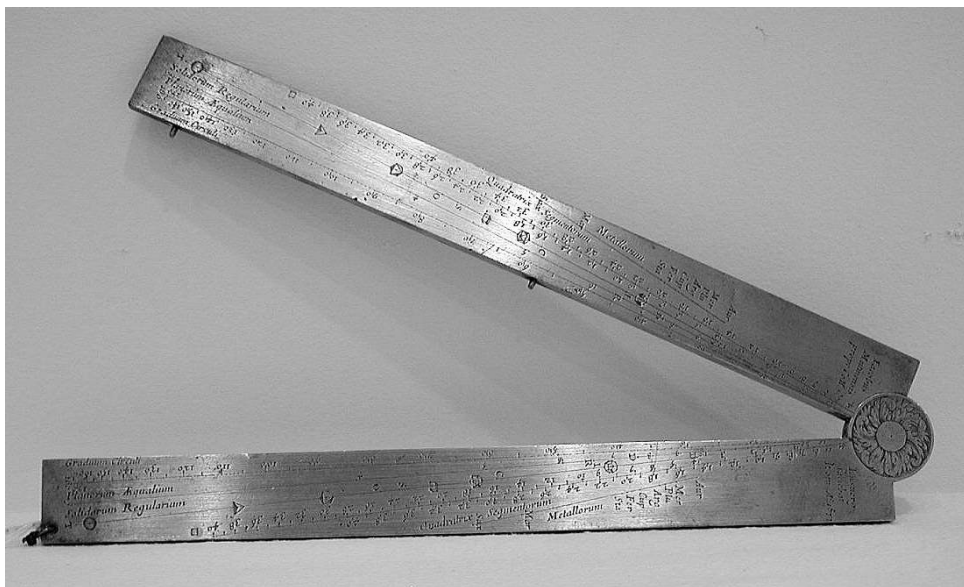

N° 9 – Regolo convertitore in legno

N° 10 – Strumento d'ottone ad uso di balistica

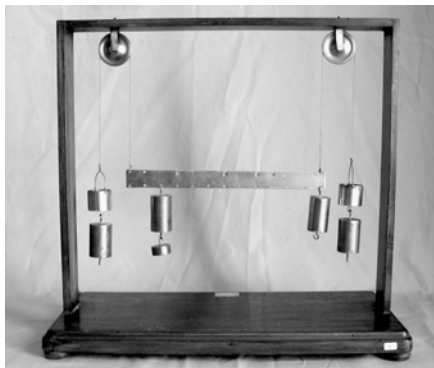

N° 12 – Compasso per misurare i diametri delle palle

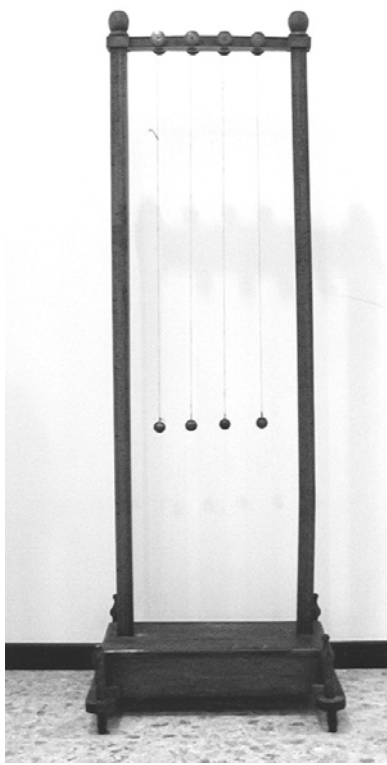

N° 13 – Compasso di proporzione di Lusverg

N° 20 – Parallelogramma delle forze

N° 24 – Apparecchio per le forze parallele

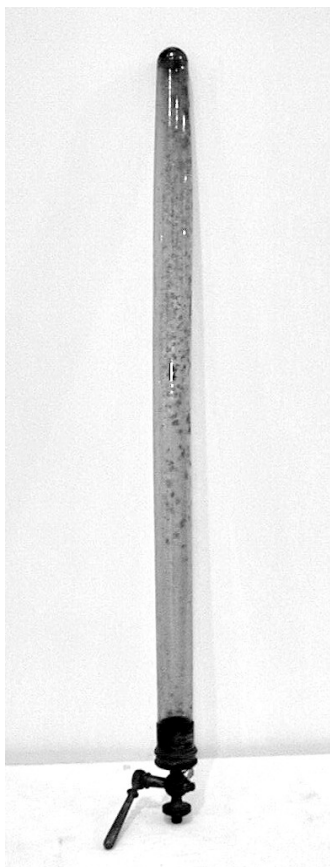

N° 398 – Sostegno con pendoli

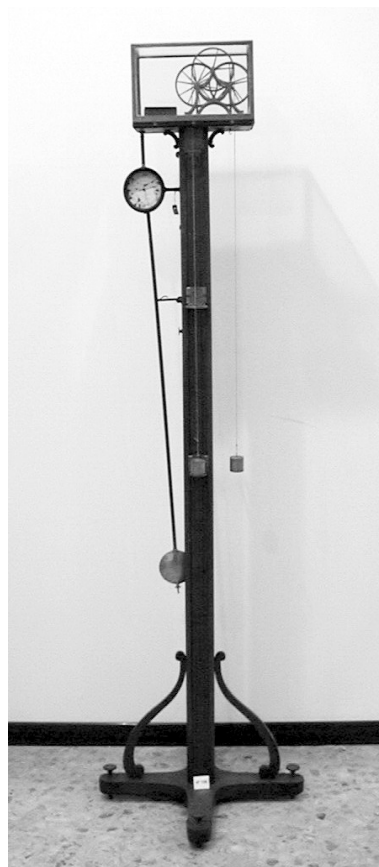

N° 34 – Apparato per il moto parabolico

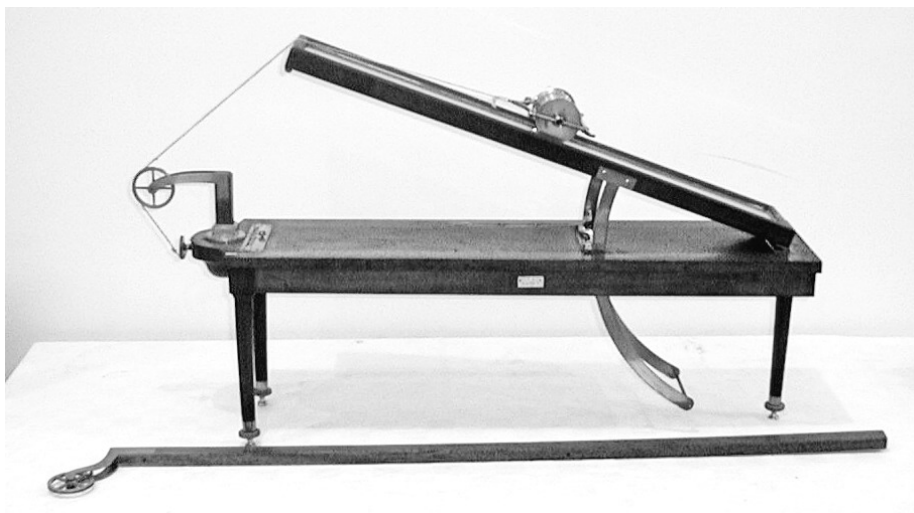

N° 28 – Dinamometro di Regnier

N° 60 – Tubo di Newton

N° 126 – Macchina di Atwood

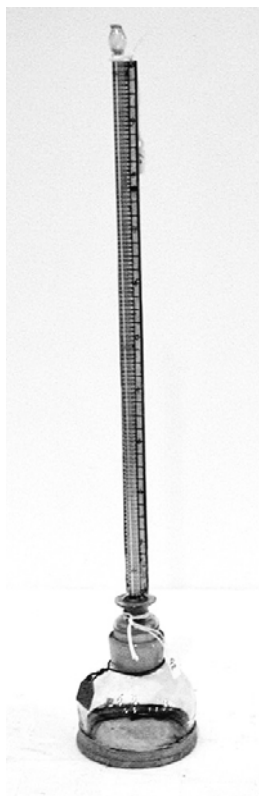

N° 22 – Piano inclinato per lo studio dell'attrito

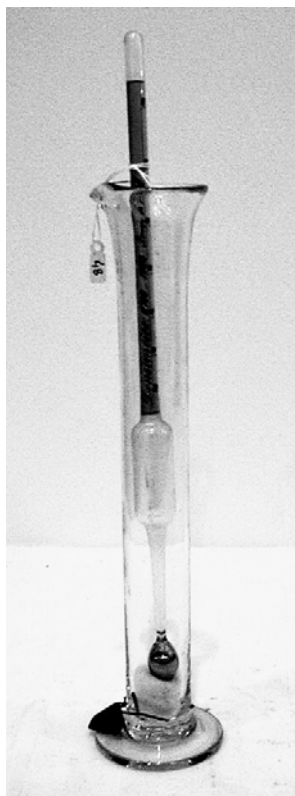

N° 38 – Apparato per il centro di gravità in tre pezzi

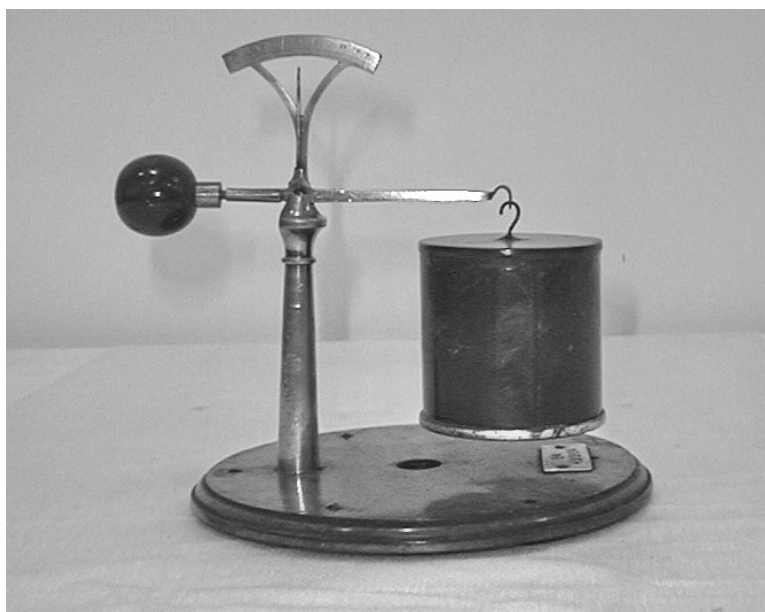

N° 35 – Paradosso meccanico (doppiocono)

N° 42 - Endosmosometro

N° 48a - Pesa acidi di Beaumé

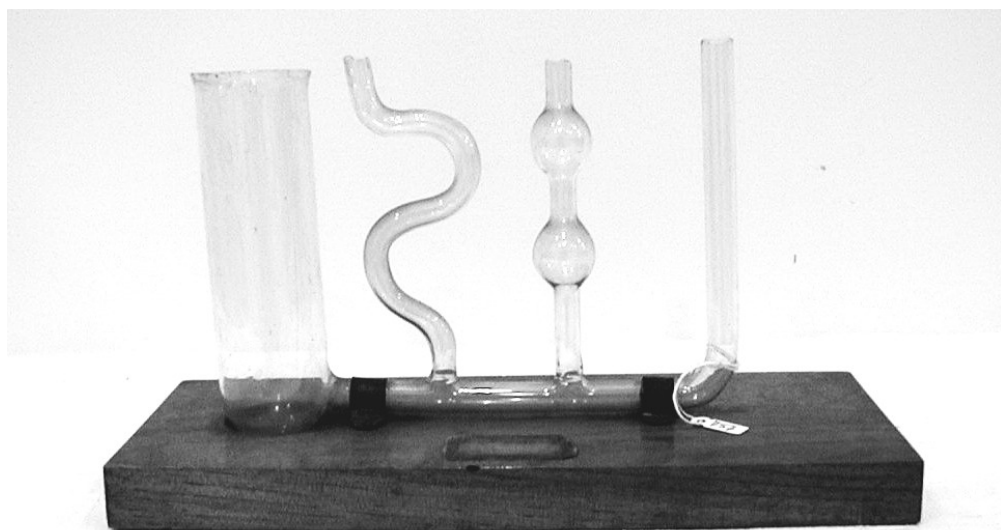

N° 64 - Baroscopio

N° 65 – Emisferi di Magdeburgo

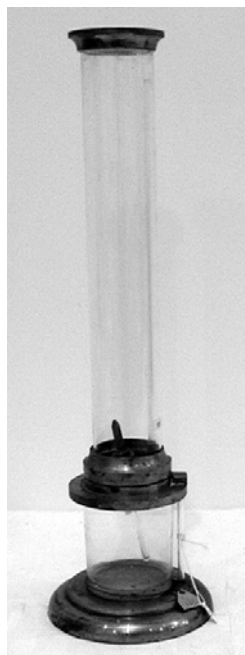

N° 49 – Areometro di Nicholson

N° 757 – Vasi comunicanti

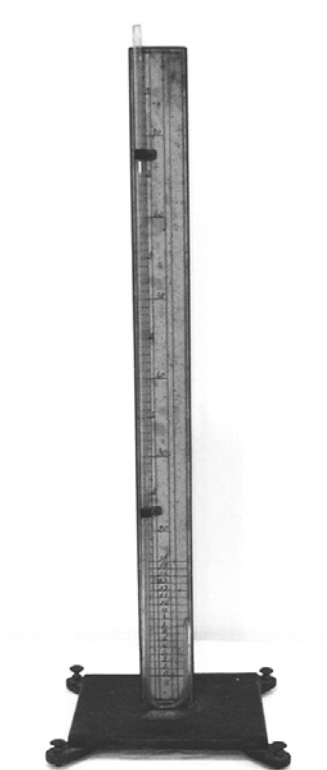

N° 51a – Bilancia idrostatica

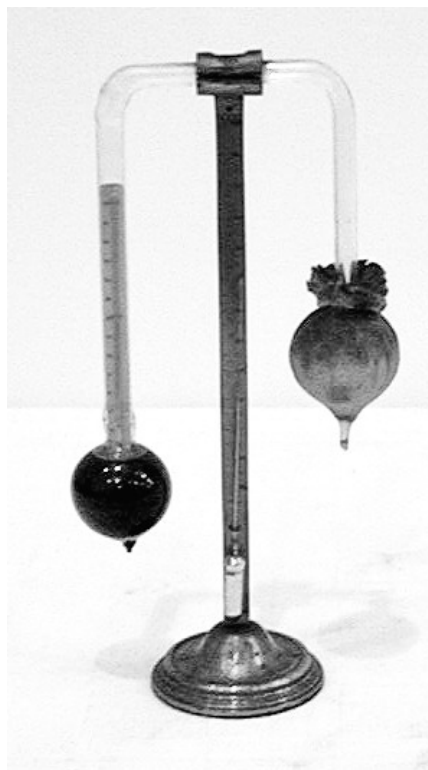

N° 61 – Fontana nel vuoto

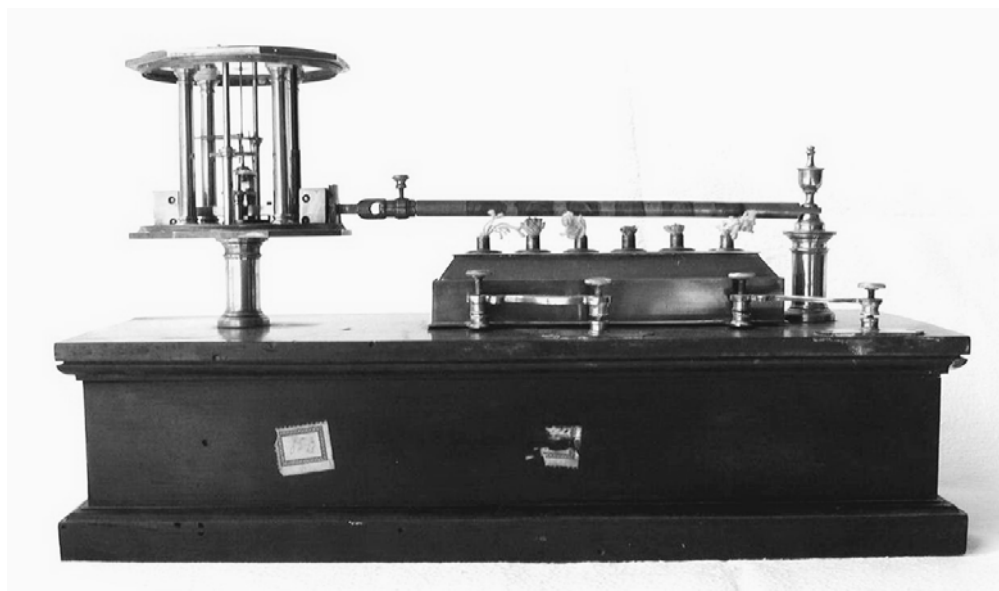

N° 262 – Apparecchio di Pascal

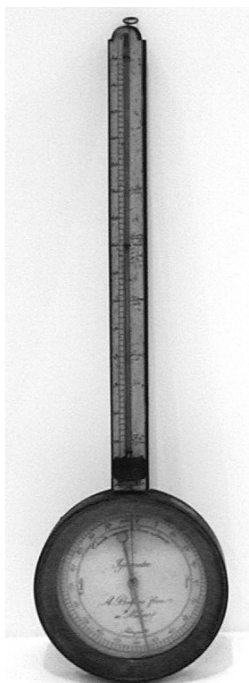

N° 77 – Tubo di Mariotte

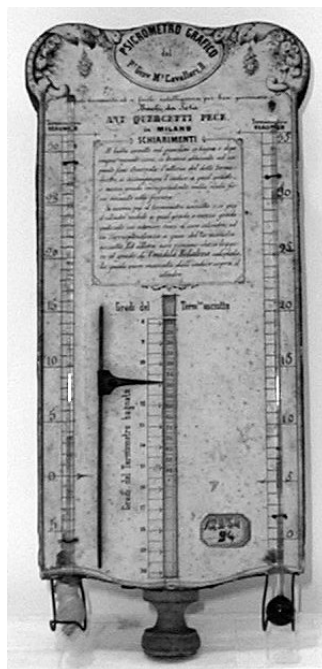

N° 81 – Igrometro di Daniell

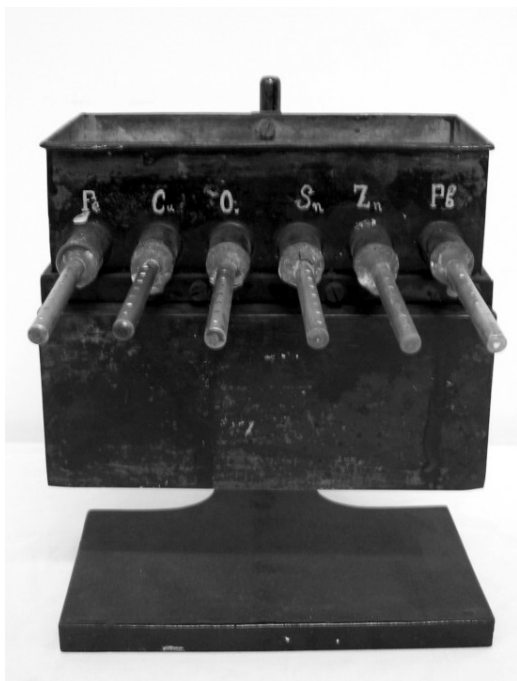

N° 85 – Pirometro a quadrante

N° 91 – Igrometro di Bellani

N° 94 – Psicrometro di Cavalieri

N° 548 – Apparecchio di Ingen-Hausz

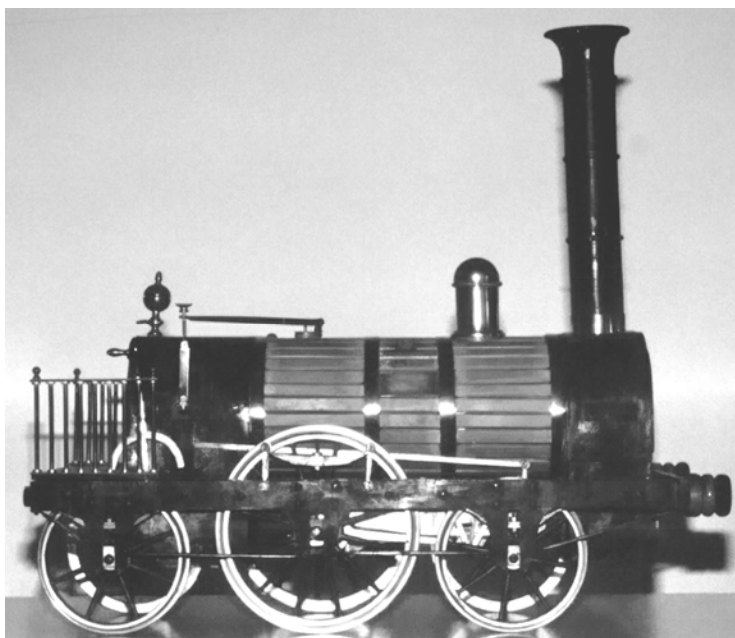

N° 127 – Barometro Fortin

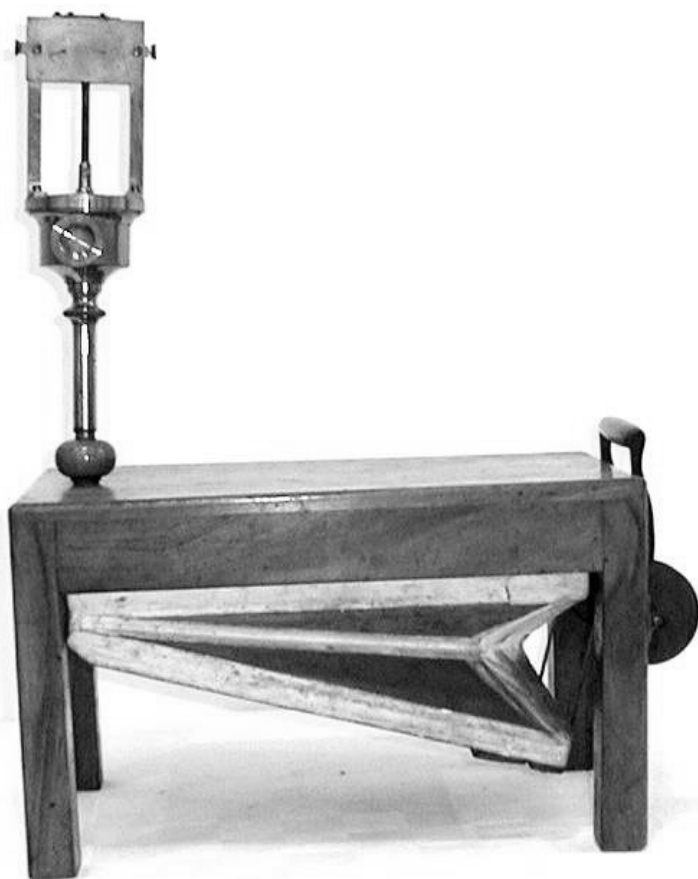

N° 119 – Apparecchio di Tyndall

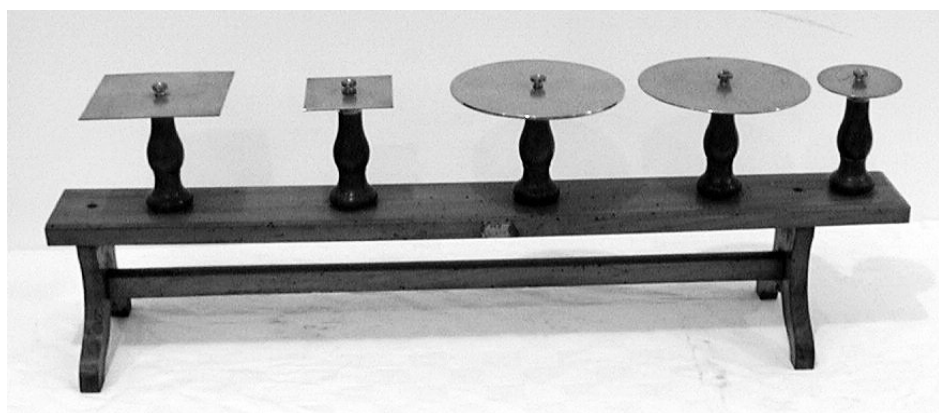

N° 93 – Igrometro di Saussure

N° 140 – Gran modello di locomotiva

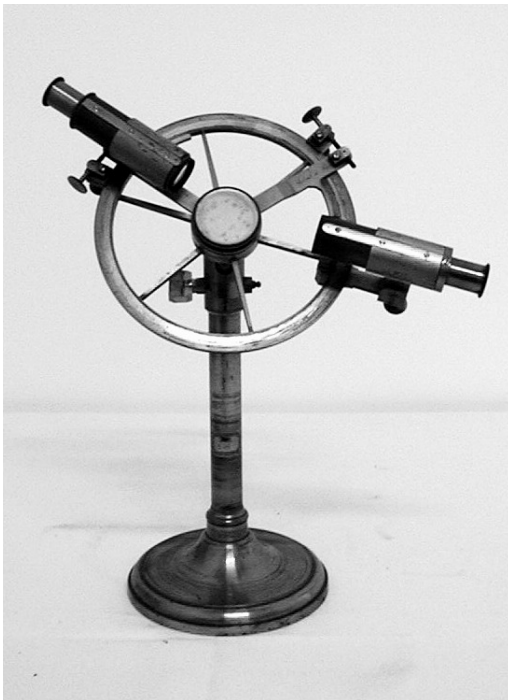

N° 147 – Sirena di Cognard de la Tour

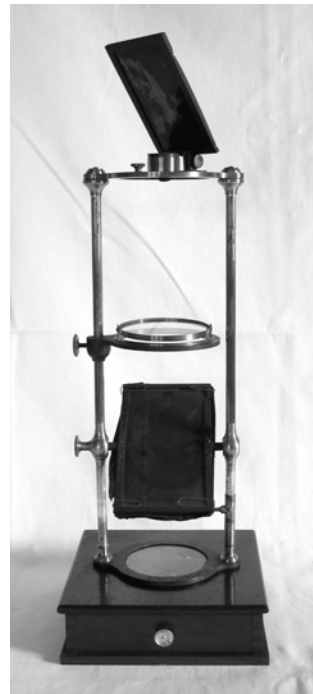

N° 163 – Apparecchio di Chladni

N° 149 – Timbro di Savart con risuonatore

N° 201 – Goniometro di Babinet

N° 200 – Polar. di Nörremberg

N° 194 – Spettroscopio di Bunsen

N° 212 – Tavola con spettro solare

N° 167 – Vecchio prisma

N° 168 – Poliprisma su piede

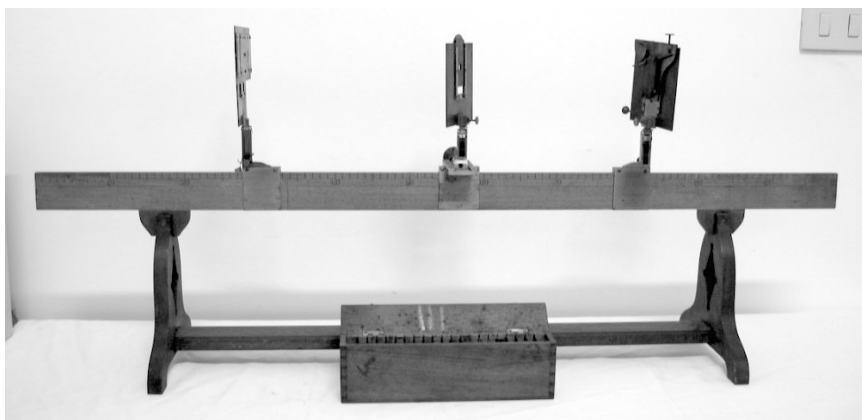

N° 294 – Prisma a lenti per le strie

N° 451 – Prisma di Amici

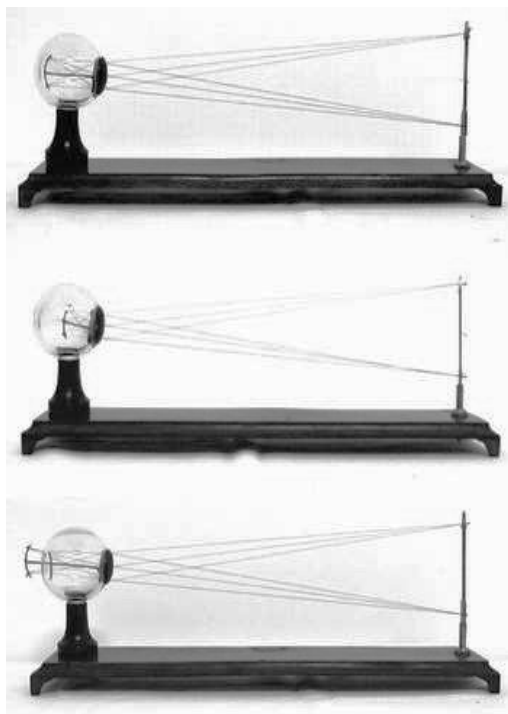

N° 190 – Eliostato di Silbermann

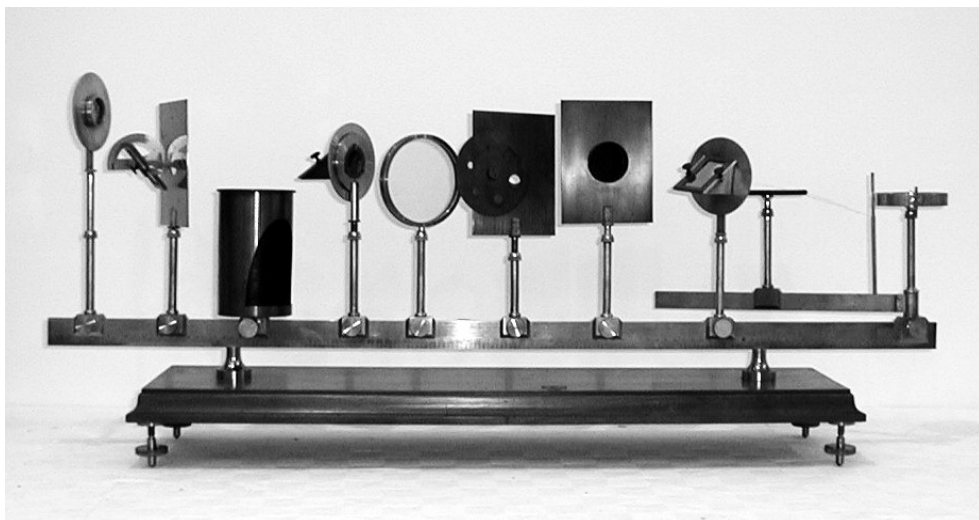

N° 211 – Banco di diffrazione col suo corredo

N° 169 – Vecchia lente

N° 160 – Modelli per i difetti della vista

N° 469 – Apparato di Melloni completo

N° 846 – App. sul funz. occhiali

N° 666 – Disco di Newton

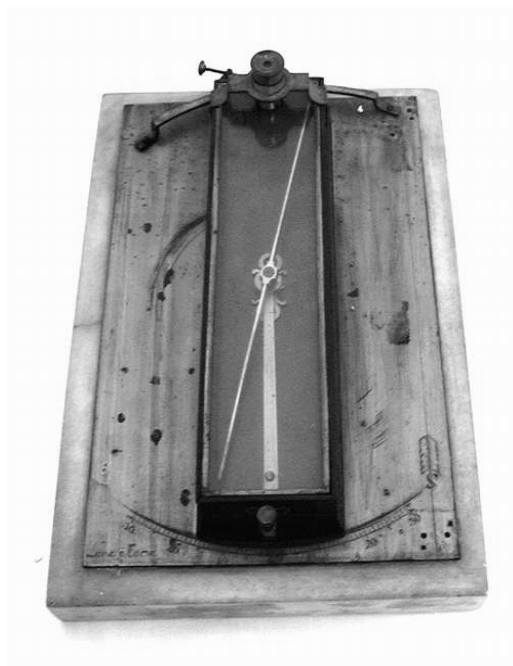

N° 500 – Praxinoscopio

N° 226 – Bussola di navigazione di Cannini

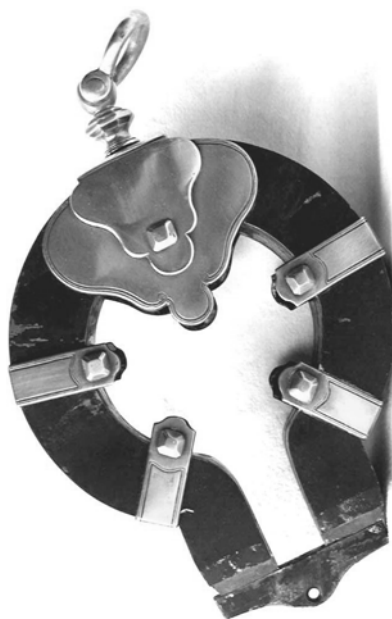

N° 215 – Ago di inclinazione

N° 218 – Bussola var. di declinazione

N° 223 – Calamita naturale armata

N° 225 – Fascio magnetico

N° 252 – Elettrometro a paglietta

N° 230 – Elettroscopio a pile secche

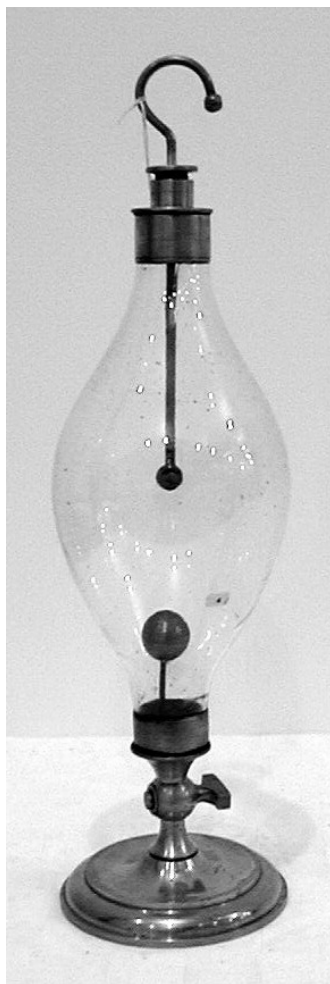

N° 268 – Bottiglie di Leida

N° 270 – Pendolo di Zamboni

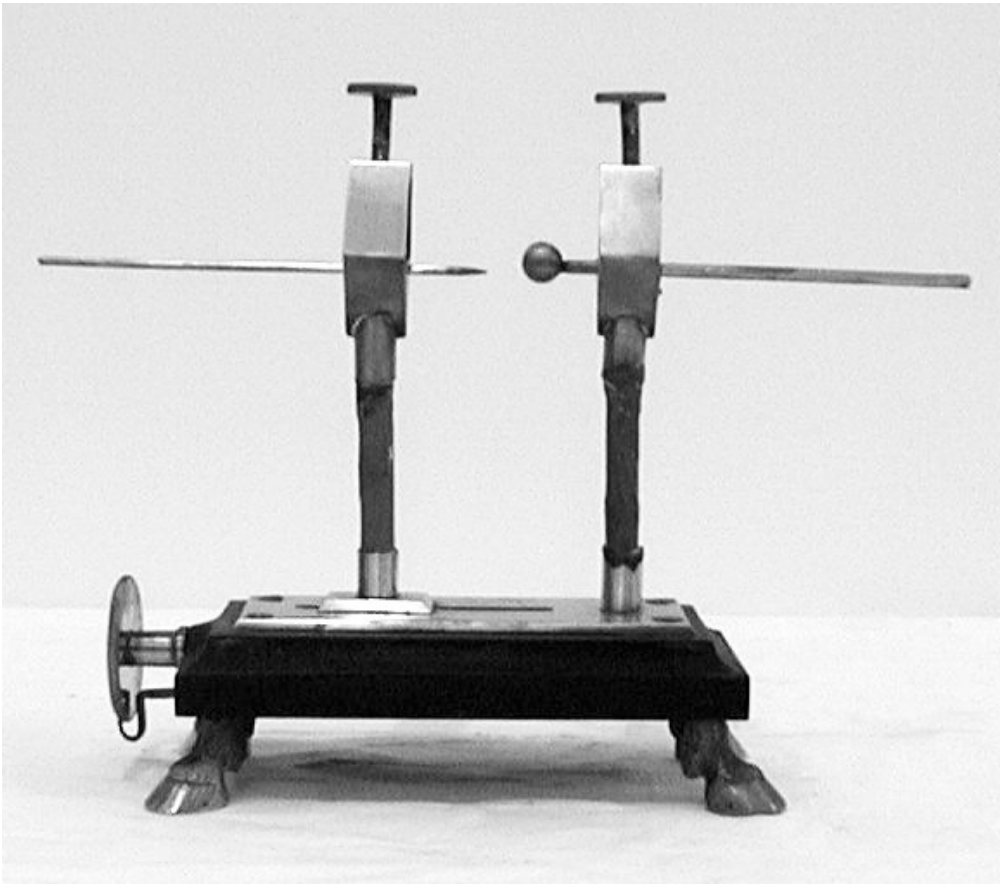

N° 337 – Accendilume elettrico

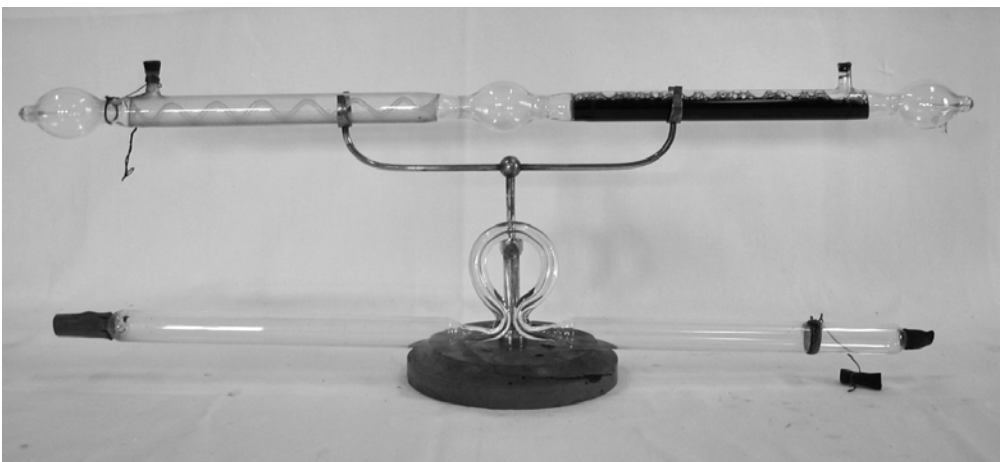

N° 248 – Ovo elettrico

N° 235 – Pistola di Volta in vetro

N° 240 – Spinterogeno di Francesco Cobres

N° 330 – Tubi di Geissler

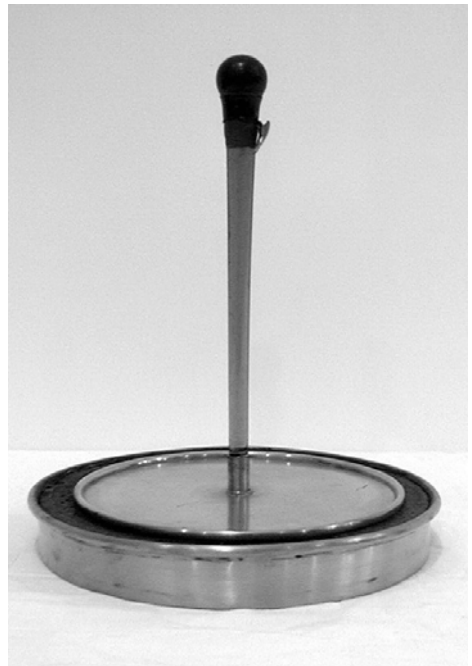

N° 228 – Apparecchio di Biot

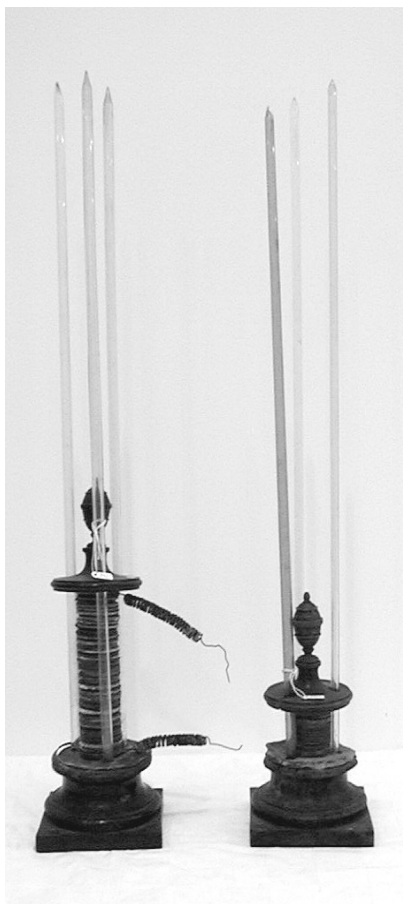

N° 514 – Bilancia di Coulomb

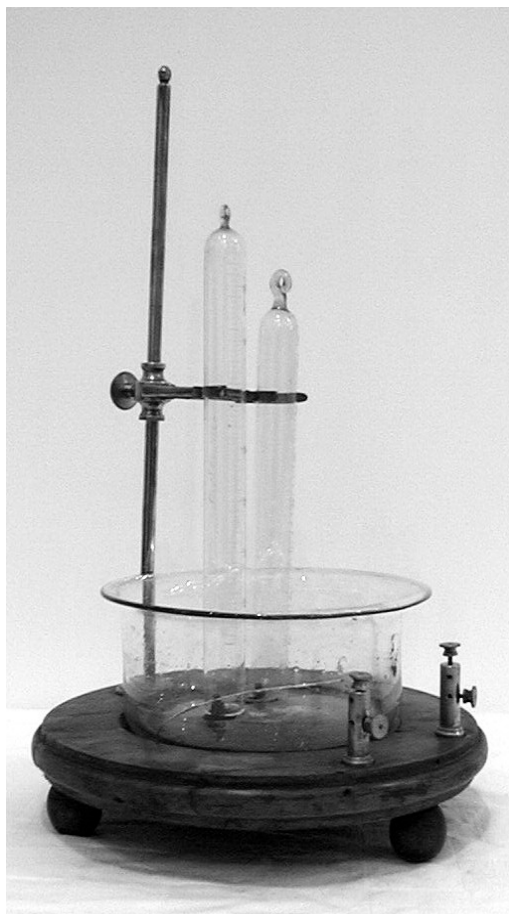

N° 396 – Macchina di Ramsden

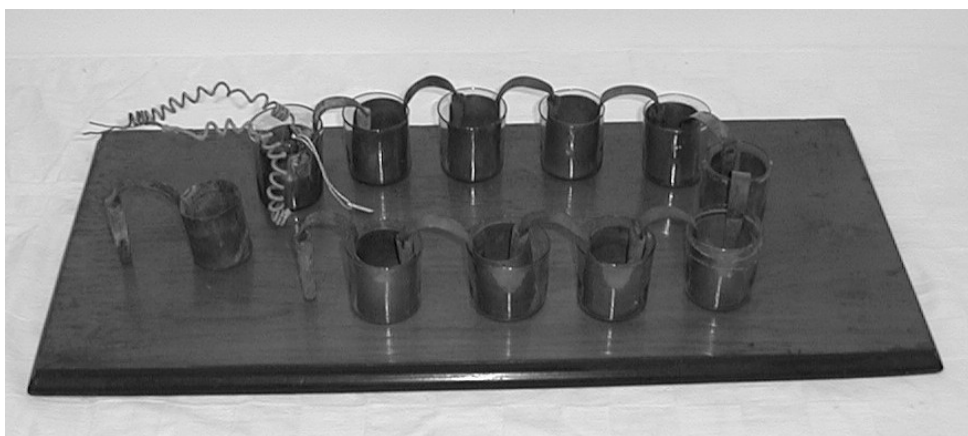

N° 492 – Elettroforo di ebanite

N° 272 – Vecchie pile a colonna

N° 563 – Voltmetro di Bertrand

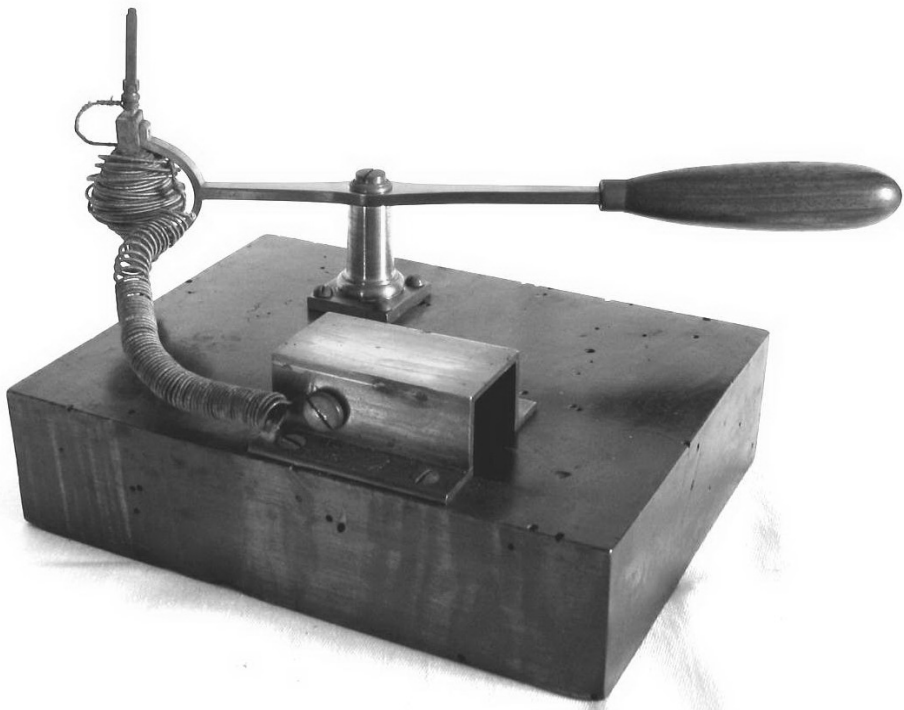

N° 275a – Pila a corona di tazze

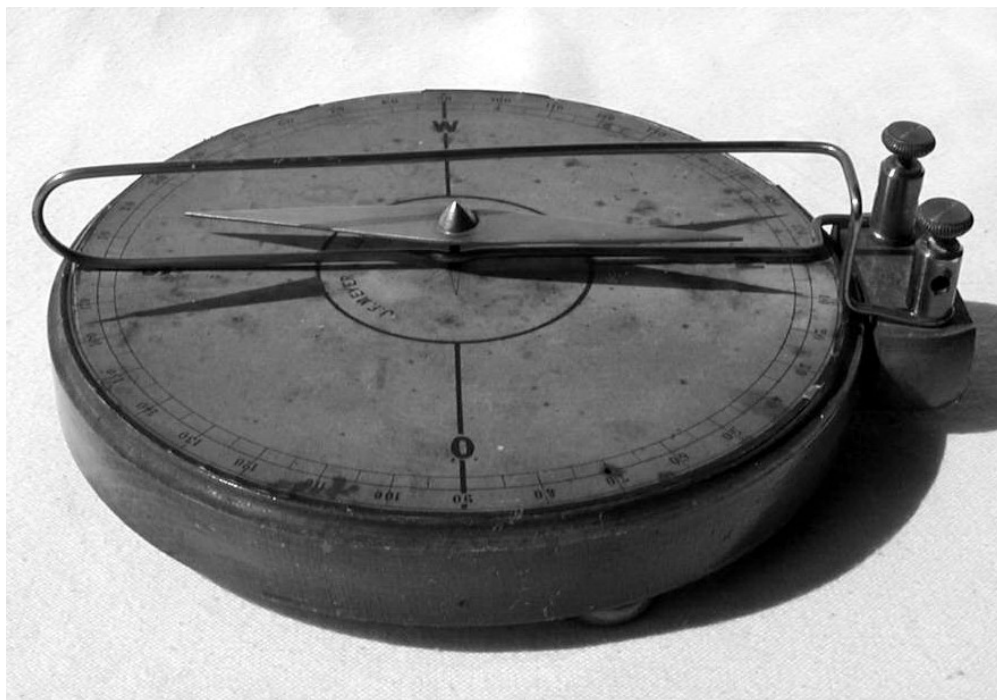

N° 293 – Galvanometro astatico di Nobili

N° 295 – Spirali di Watkins

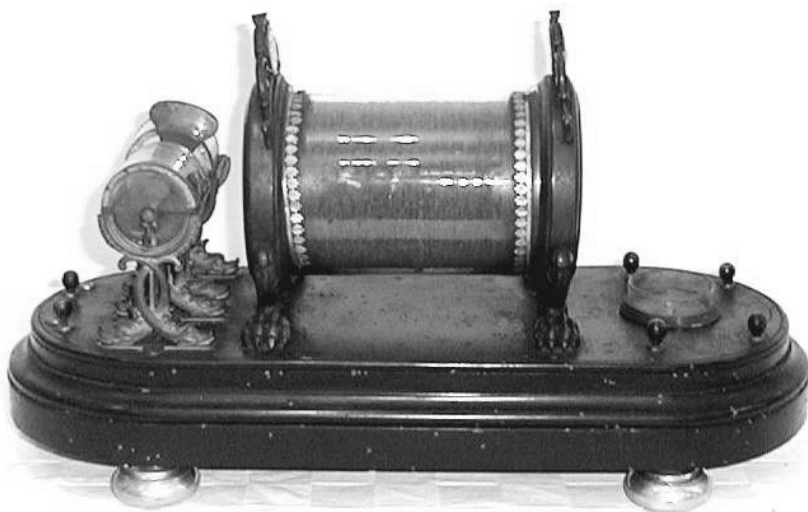

N° 283 – Calamita scintillante

N° 298 – Apparecchio di Oersted

N° 324 – Apparecchio di Arago

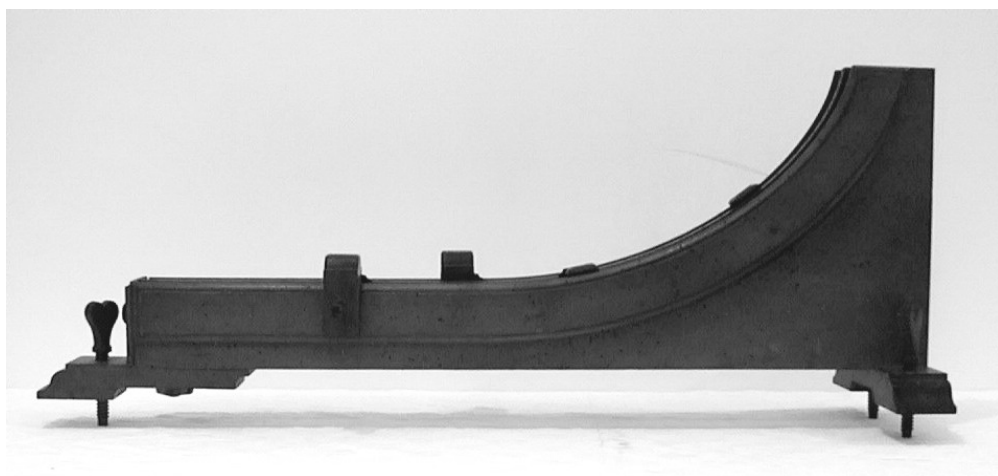

N° 326 – Vecchio rocchetto d'induzione

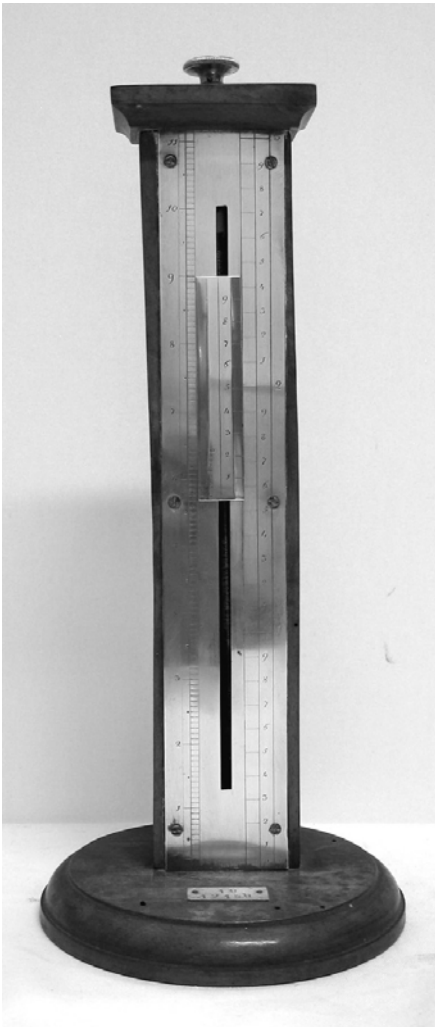

N° 638 – Macchina "per i disturbi nervosi"

N° 247 – Dischi d'ottone isolati

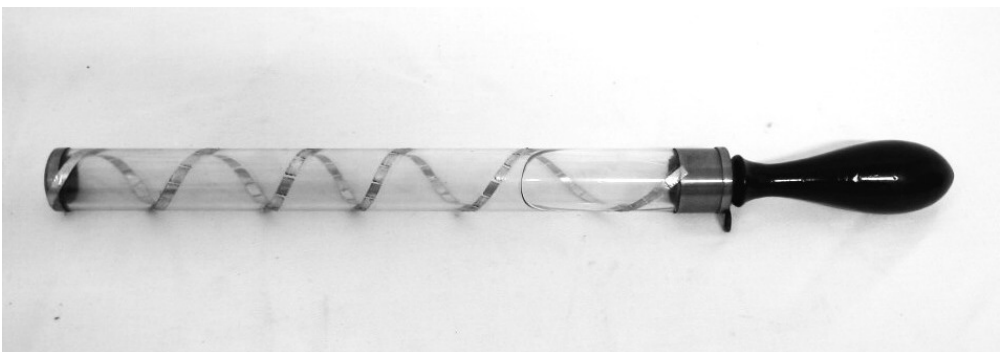

N° 33 – Apparecchio per il tautocronismo della cicloide

N° 19 – Nonio

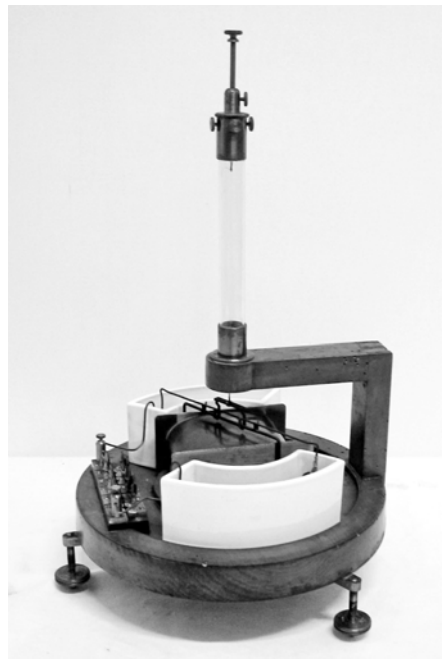

N° 177 – Camera per dagherrotipi

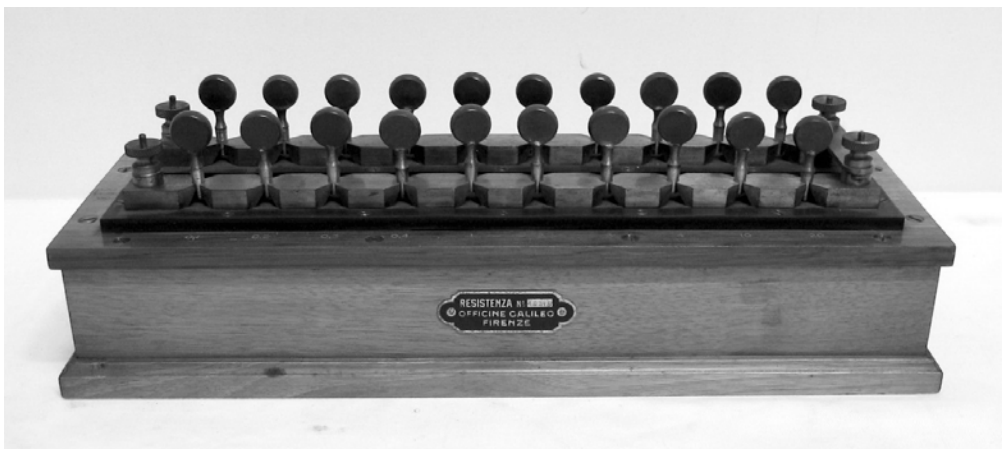

N° 615 – Tubo scintillante

N° 158 – Tubo acustico

N° 281 – Galvanometro

N° 898 – Cassetta di resistenze
